

FUTRIX®

FUTRIX SOFTWARE PRODUCT OVERVIEW

"Futrix software is extremely powerful and easy to use. We are continuously amazed at the level of flexibility the software provides and how well it can be tailored for our specific business needs."

Adnan Vora

Vice President, Application Development, HDMS - Health Data Management Solutions

PRODUCT OVERVIEW

Futrix is a web based business intelligence software solution with a comprehensive set of tools for analysis and reporting. Futrix offers easy access to information for business users. Futrix provides the freedom to navigate and explore information in an unconstrained way, enabling users to get faster answers and become more self-sufficient.

Futrix delivers to you:

- Quick and easy access to information
- Intuitive look-and-feel that can be adapted to your branding
- Navigation without pre-defined constraints
- Visual discovery using tabular views, graphs, heat mapping and geographic maps
- User defined dashboards with actionable email alerting
- Shareable results in several popular document formats
- Seamless integration with existing data and security infrastructure
- Rapid deployment and management from any web browser
- Reduced IT development and support costs with users becoming more self-sufficient

“Futrix provides a very comprehensive set of tools for analysis and reporting. We also find it easy to customize the product to suit our exact requirements.”
